Sedgwick County Join HeartCorps

HeartCorps is a public health AmeriCorps service opportunity for those interested in gaining valuable professional public health experience while advancing more equitable health outcomes for rural communities.

People in rural areas live **three years fewer** than people in urban areas, with rural areas having **higher death rates** for heart disease and stroke.

Under-resourced communities and those living in rural areas face the highest death rates due to hypertension.

Making matters worse, rural communities face a critical shortage of health care professionals, including public health workers, which negatively impacts the care rural residents receive.

HeartCorps Service Members will serve in-person and gain valuable experience supporting, developing, and implementing programs and education around high blood pressure, nutrition security and smoking cessation.

Service placements start February 12, 2024
